

# Make remote working personal

By using eve's collaboration feature, you can work with users in real time, through audio conferencing and web based screen sharing.

## Collaboration

eve's innovative collaboration functionality has been proven to revolutionise the way people work, replacing time consuming email trails with smart and swift interactions.

Task lists are shared across groups and updated in real time, making it easy to track progress on projects. eve's collaboration features simply deliver, where other solutions have fallen.

### KEY BENEFITS

#### Work in single pane

With eve's single plane interface, speed and efficiency are accelerated. No more navigation between tabs; access, control and manage all in one place.

#### Multi-device

eve's collaboration tool can be used on multiple devices so you are not restricted to one workspace. Wherever you are, you can collaborate with colleagues on desktop, laptop, mobile and tablet.

#### Efficient working

Highly efficient and effective teamwork becomes a reality. Chats, content sharing, collaborative white board sessions, pictures, videos, presentations, graphic and vocal annotations - all in one place.

#### Real-time communication

As with all eve features, the service is exceptional, everywhere. This means that you will experience instantaneous results when interacting via eve's collaboration tool.
