

# Integration across different systems

Integrate eve with your key systems.

## Integration

eve's state-of-the-art system can easily be integrated with your key systems for seamless working.

The integration feature will work with many different systems. From communication platforms such as Skype for Business and Outlook, to CRM systems such as Salesforce and Dynamics.

## KEY BENEFITS

### Caller search

eve will automatically search any integrated systems, so you can quickly find a contact or know who's calling.

### Presence sharing

Skype for Business integration gives eve access to share and update your presence status when you're on a call.

### Screen popping

Simply click a button or set up automated screen popping which will present the caller's CRM record when you make or receive a call.

### Click-to-dial

Copying a number will allow you to 'click to dial' via a pop up. You can also click a number within a web page or any of your connected systems to dial.
